SUMMARY

I am a backend developer specialized in modern technologies with practical experience in building stable and secure server-side applications using Django, Django REST Framework (DRF), Python, and Java. I have algorithmic knowledge in the C programming language and am also capable of integrating with user interfaces using HTML, CSS, and JavaScript. I adhere to principles such as systematic thinking, code quality, security, and effective teamwork, with the goal of becoming a top-level backend developer.

WORK EXPERIENCE

Back-end Developer ‖ IFPS(ABCO)   **Jan 2024 - Present**

- We developed a school management system from scratch, improved operational efficiency, integrated data via a Telegram bot, and digitized communication between employees and employers.

IT Specialist / Python Back-end Developer ‖ Edu Space LC   **Sep 2023 - Dec 2024**

- Actively participated in the management of an educational center and worked closely with students. Gained hands-on experience in back-end development using Python and the Django framework through multiple practical projects. These projects involved working with databases, implementing user authentication, developing APIs, and optimizing system performance. Strong skills in teamwork, systematic thinking, and problem-solving.

IT Teacher / C Developer ‖ Lumos MIND   **Feb 2022 - Avg 2023**

- Passionate IT Teacher with 1+ year of experience teaching Programming (C, Python,), Web Development, and Network Fundamentals. Skilled in mentoring and helping students succeed in tech.

EDUCATION

TDPU UNIVERSITY   **Sep 2020 - Jun 2024**

- Field of mathematics and informatics

NAJOT TA'LIM ‖ CAMBRIDGE LC   **June 2022 - Dec 2023**

- Backend developer
- English language
